RESPONSE TO RESTRICTION REQUIREMENT

Assistant Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

This is in response to the Office Action dated October 4, 2000, for which a response was set to expire November 3, 2000. A Petition for an Extension of Time of one month until December 3, 2000, is attached hereto along with the required fee. A change of address is also enclosed herewith. Restriction was required.

Applicants hereby provisionally elect to prosecute the invention of Group XVI associated with claim 21, which is directed to a screening method. This election is made with traverse.

Applicants are somewhat baffled by the restriction requirement. It appears to be a cross between restriction and an election of species. There is no basis for treating each nucleotide and

amino acid sequence as a separate invention; all are related by the property that they encode T-type calcium ion channels.

Applicants would be willing to elect a species of the heterologous α_1 subunit of mammalian T-type channel used in claim 1 as a starting part for search; however, applicants cannot understand the approach taken by the Office that each related sequence represents a separate invention.

Reconsideration of the restriction requirement is respectfully requested.

In the unlikely event that the transmittal letter is separated from this document and the Patent Office determines that an extension and/or other relief is required, applicant petitions for any required relief including extensions of time and authorizes the Assistant Commissioner to charge the cost of such petitions and/or other fees due in connection with the filing of this document to **Deposit Account No. 03-1952** referencing docket no. **381092000720**. However, the Assistant Commissioner is not authorized to charge the cost of the issue fee to the Deposit Account.

Respectfully submitted,

Dated: December 4, 2000
